

carriage prototype plan view sketch #1

This is the scheme where carry sectors operate directly on the carriage figure wheels, not on the carriage pinion.

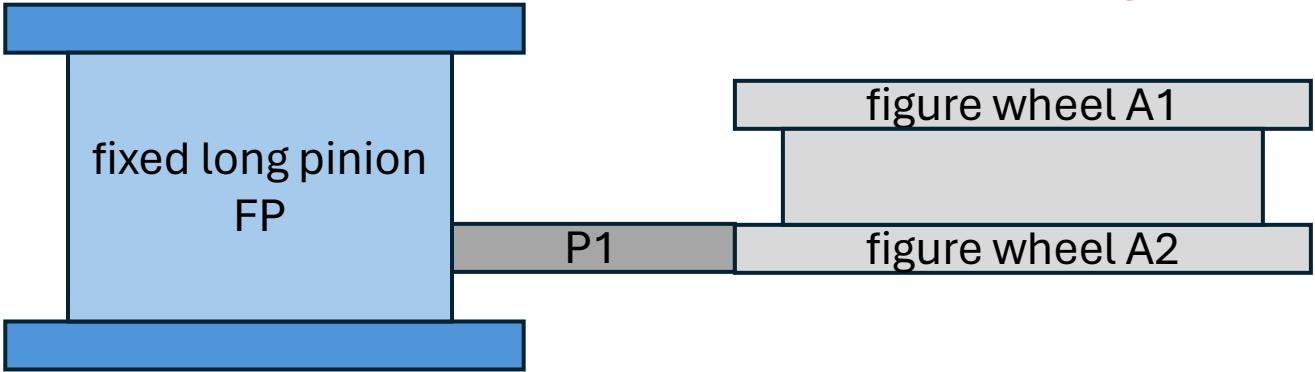

add A1 to C

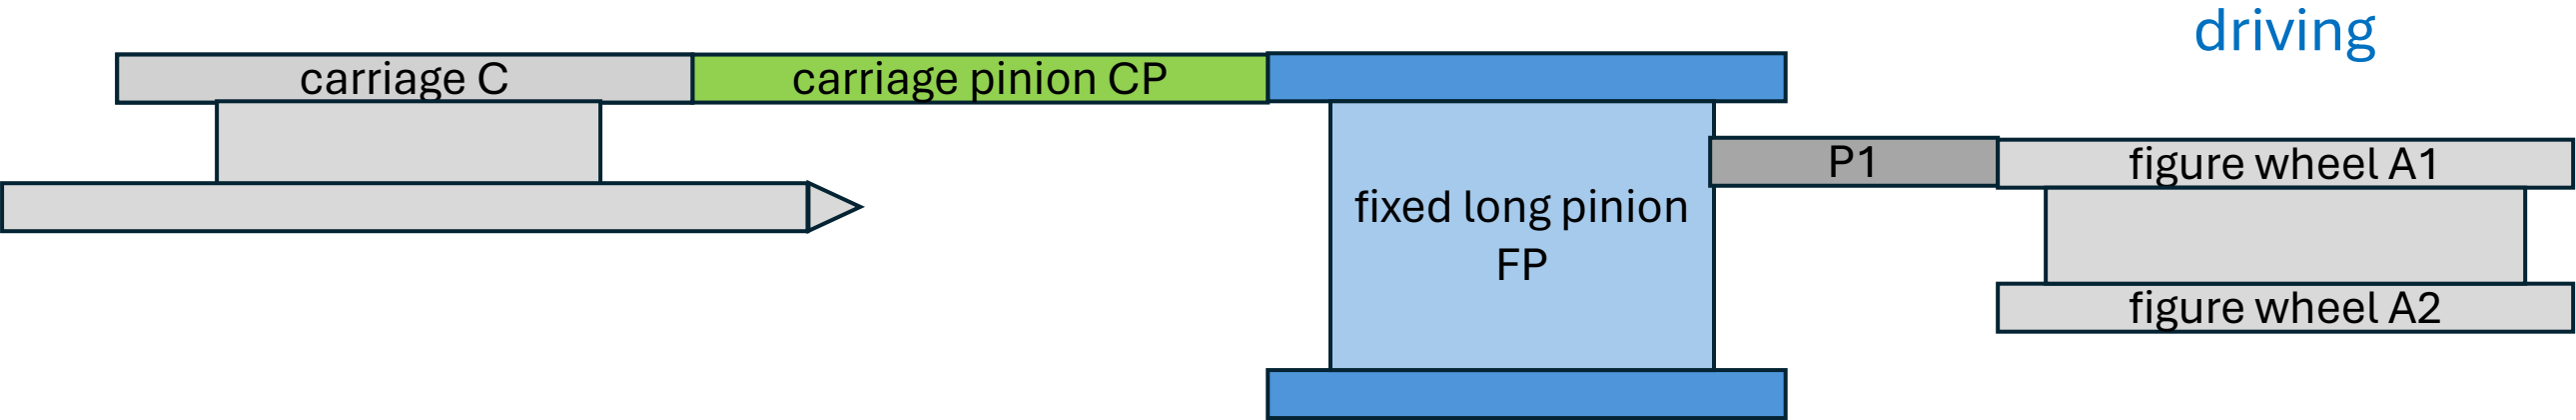

driving

and optionally give off A1 to A2

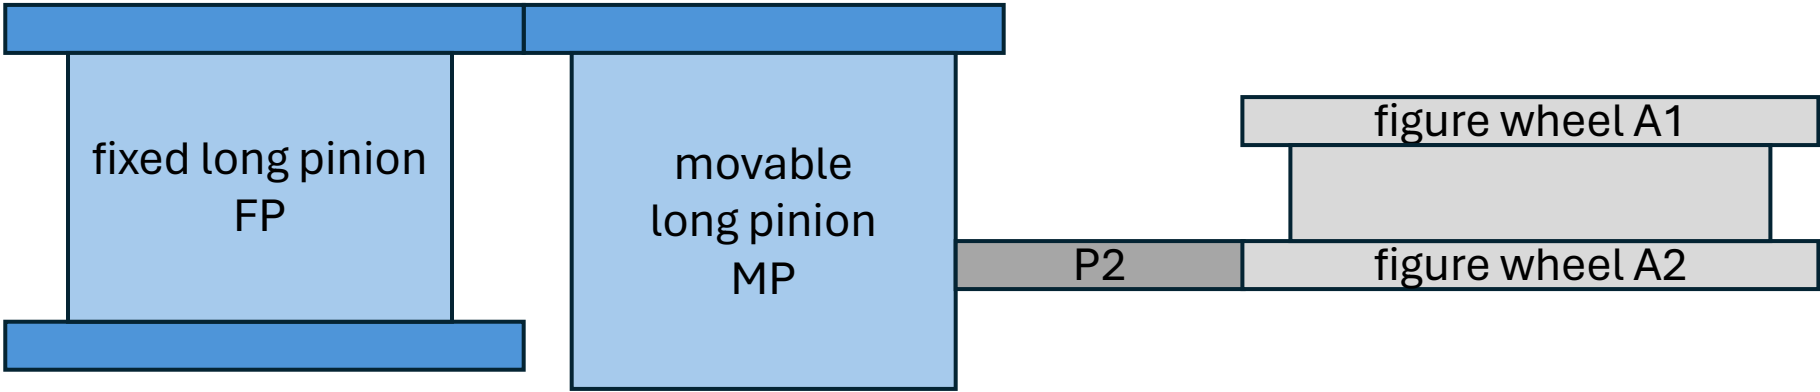

could exchange A1 and A2

subtract A1 from C

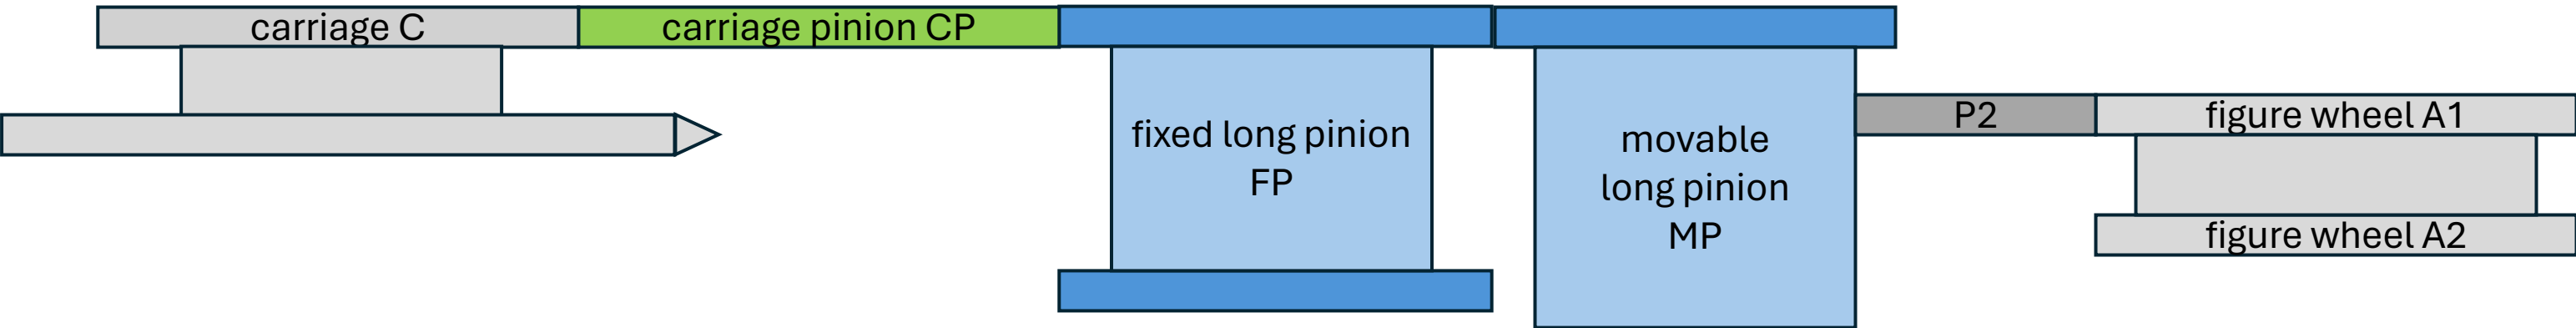

and optionally give off A1 to A2

could exchange A1 and A2

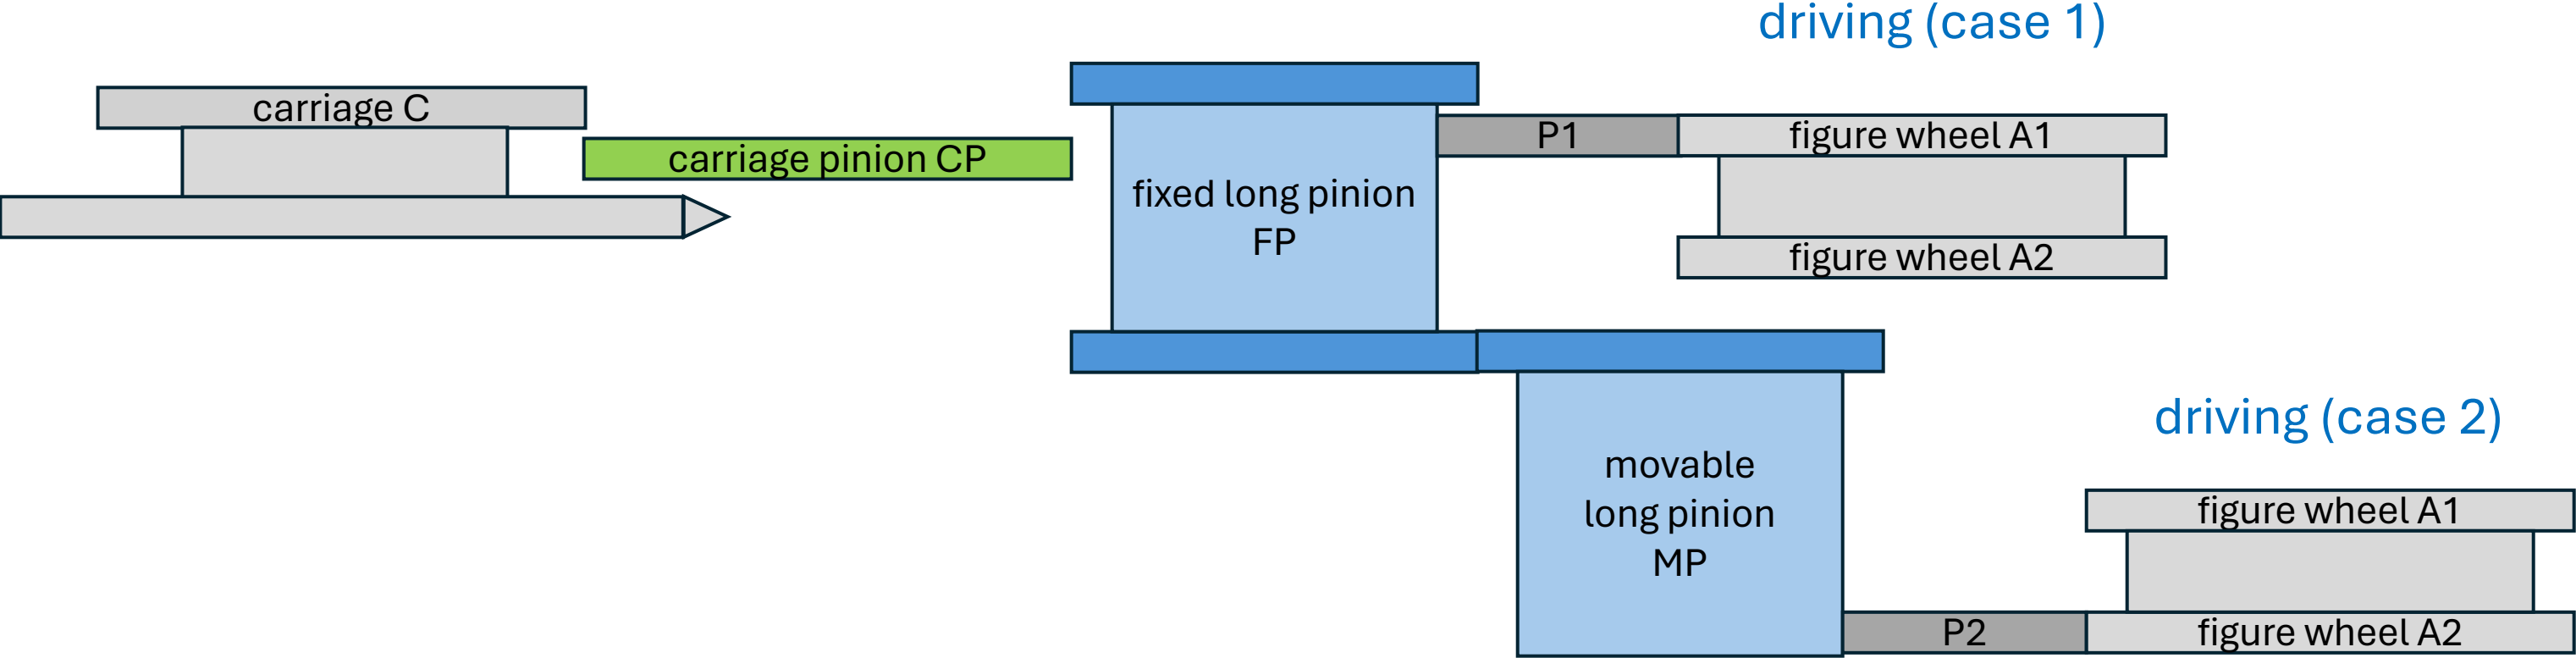

give C to A1

driving

could substitute A2 for A1

shift A1 right to A2
shift A2 left to A1

could exchange A1 and A2
